

NRW MS

WebPage Curriculum Planning Sheet

March 2001

In order to increase communication with parents through the district WebPage, I would like everyone to write a brief, parent friendly expectation and curriculum page.

1. **Curriculum** - develop a brief, outline of what you teach during the school year.
2. **Expectations:**
 - Supplies needed by the student
 - Homework, projects if appropriate to your area
3. **Grading** - How you will derive a grade for a student. You might want to be specific or leave yourself some space.

Remember NOT to use educational jargon - this must be friendly to use by ALL our parents.

This part of the WebPage would be found by clicking on the NRW website and then into the MS site then into you by teacher name. This part of the website would be static and may not change during the school year unless you decided to do so. You would not input this part of the WebPage.

The **DocuShare** software would allow you to **post** homework or messages to parents and students. This input would be done by the teacher and would be changed as you assign homework or announce quizzes, tests or projects.

As you complete the written part - please give it to Kim Sherwin
