### What do you do when you are sad and the people around you won't leave you alone?

- \*Be thankful you have people around who care\*

## PS2 Review

### This months game: "Area 51"

Chris Petty, Sophomore

**Summary:** You are Ethan Cole, a soldier sent into the underground military base of Area 51. You have no clue what your mission is, but you have heard rumors that have come out of there. When you get down there, you are thrown into immediate action, fighting hordes of humans who have been infected with a virus that alters their body structure making them stronger yet very stupid, although some can use guns. Things don't start off that great either; pretty much first thing your buddy gets his head ripped off, and you get infected; however, by the means of a rare genotype, you gain the ability to mutate at will into one of the creatures. To make things worse, not only do you deal with infectious humans, it turns out Area 51 was built on top of an alien colony, and they want their revenge. Oh joy!

**Gameplay:** Okay, looking for a game that has a wide choice of weaponry... this isn't it. There are a total of six different weapons and two types of grenades. All the weapons have a melee function, and you can go dual fire action as long as you have two of the same guns. There is never a dull moment! When you think you have killed all the enemies in one area, more will show up. Where the game lacks in weaponry it makes up in voice acting. David Duchovney (Agent Mulder from "The X-Files" and the main character from "XIII") does the voice for Cole, which is so flipping cool. When you scan someone, they interact by saying something hilarious like "A little to the left." or "That feels so good, yet so awkward."

**Ranking:** I give "Area 51" an 8 out of 10!

**Next Month:** "Ultimate Spider-Man"
