

**Monotype Landscape
Exhibition**

October 25th 6PM – 8PM

North Rose-Wolcott

High School Art Department

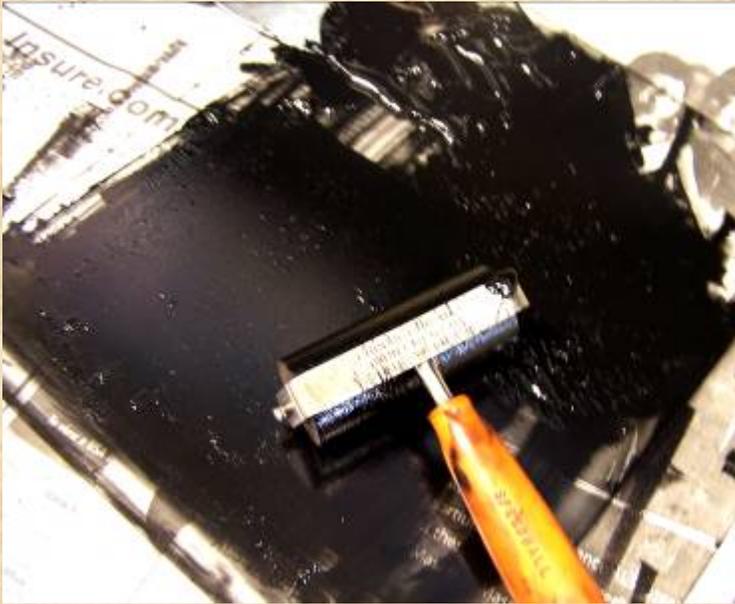

On September 22nd, printmaker Will DeMott came to give a presentation on monotype printing for the high school art students of North Rose-Wolcott. He spent the day doing a hands on workshop for over 150 students.

Using ink, a roller, a plexiglass plate and a variety of everyday tools, students created detailed landscape imagery.

Landscape by Alexandria P.

Ink and roller

**Brushes, cardboard pieces,
kitchen scrubbers.**

Students start by rolling up the entire plate with ink.

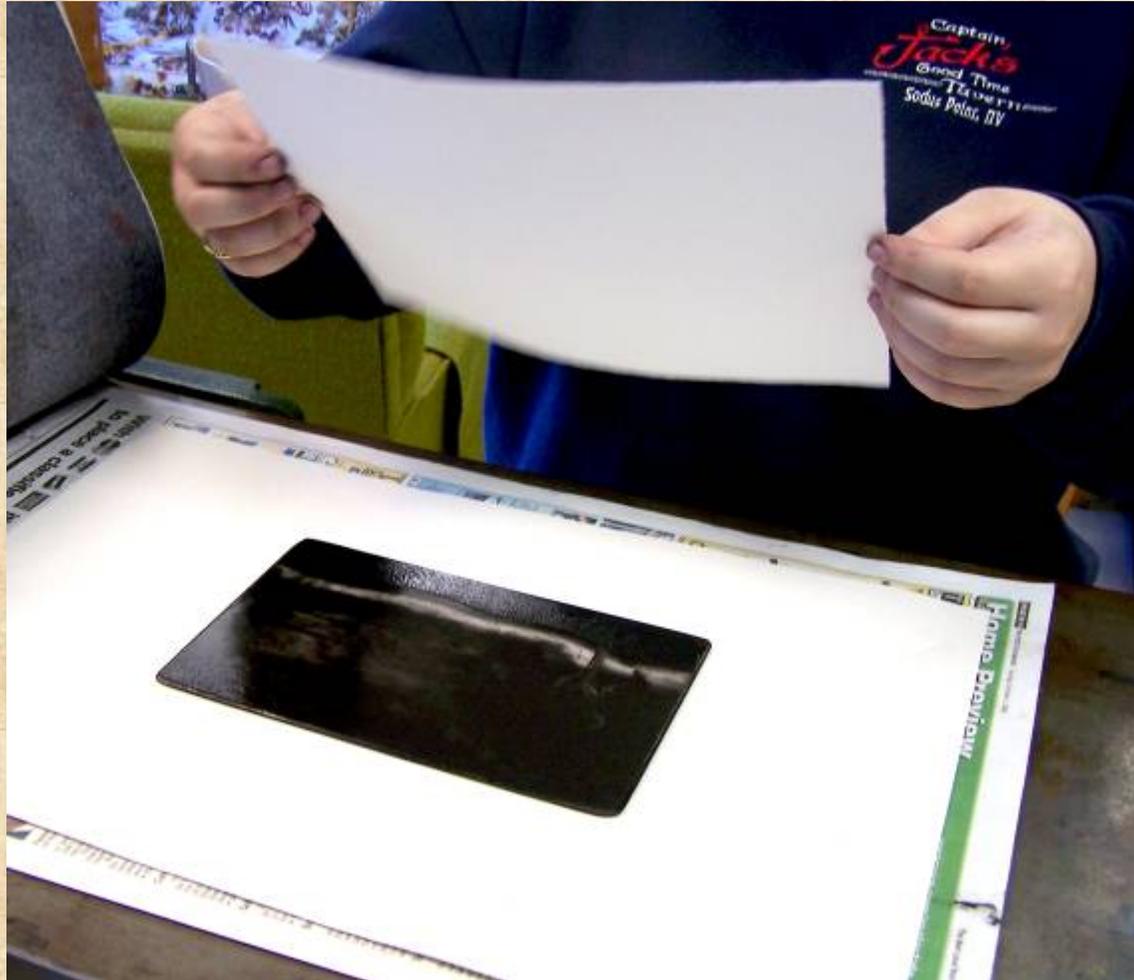

Then the ink starts to come off and the image emerges....

**..working with q tips, paper towel, scrubbies,
cardboard...whatever will get the ink off and create the trees,
the sky, the land.**

The finished plate goes to the press and is covered with a fresh piece of dampened paper.

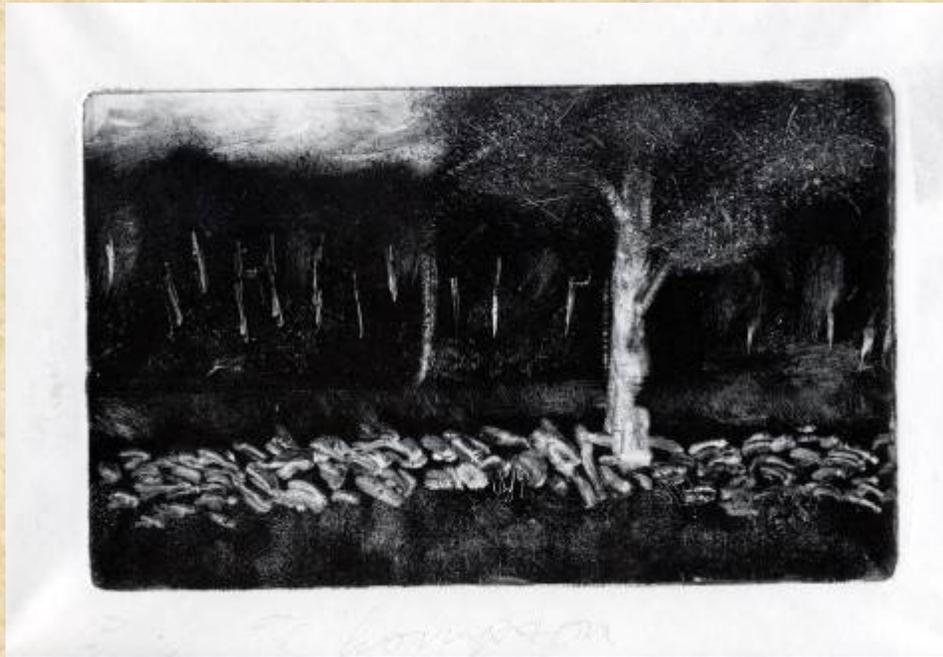

**The plate and the paper are rolled through the press.
Olivia K. displays her finished image.**
