

## Spanish web sites

A great site to try  
<http://www.quia.com/dir/spanish/>

My students here at New Mexico State University stumbled on to this awesome website:

<http://www.awesomelibrary.org/espanol.html>

I know this is probably more advanced than what your students are ready for, but you may want to check out:

[http://language.msn.com/learn\\_main.asp](http://language.msn.com/learn_main.asp)

It has several free lessons (10 each) in Spanish or French.

Spanish Language Web Sites?

If you go to [www.altavista.com](http://www.altavista.com) you can request websites by languages I am a sixth grade middle school teacher looking for some Latin America sites that are easy to use and appealing for young people. Most of the sites I have come across are difficult to navigate. I am including a wonderful kid friendly site for Mexico in case any one elses is on the same quest as I am.
