

**Mission Statement:** It is the mission of the Elba Central School District to actualize the phrase “Elba Equals Educational Excellence for Everyone.” We are committed to providing both quality and equity. Every student will have the opportunity to develop to the best of his/her ability.

**Elba Standards:** In addition to the knowledge and basic skills they need in order to participate in society, graduates of Elba Central School will develop:

1. Empowering skills: decision making, goal setting, creative thinking and problem solving abilities;
2. Communication and social interaction skills;
3. Technological literacy;
4. Total wellness (social, physical, emotional health and self-esteem);
5. The values necessary to participate in society.

As a result of achieving these outcomes, our students will embrace lifelong learning.

**New York State Standards: MST**

**Standard 1:** Students will use mathematical analysis, scientific inquiry, and engineering design, as appropriate, to pose questions, seek answers, and develop solutions.

**Standard 2:** Students will access, generate, process, and transfer information using appropriate technologies.

**Standard 5:** Students will apply technological knowledge and skills to design, construct, use, and evaluate products and systems to satisfy human and environmental needs.

**Standard 6:** Students will understand the relationships and common themes that connect mathematics, science, and technology and apply the themes to these and other areas of learning.

**Standard 7:** Students will apply the knowledge and thinking skills of mathematics, science, and technology to address real-life problems and make informed decisions.

**National Standards:**

Standard 1: Students will develop an understanding of the characteristics and scope of technology.

Standard 2: Students will develop an understanding of the core concepts of technology.

Standard 3: Students will develop an understanding of the relationships among technologies and the connections between technology and other fields of study.

Standard 8: Students will develop an understanding of the attributes of design.

Standard 9: Students will develop an understanding of engineering design.

Standard 10: Students will develop an understanding of the role of troubleshooting, research and development, invention and innovation, and experimentation in problem solving.

Standard 11: Students will develop abilities to apply the design process.

Standard 12: Students will develop abilities to use and maintain technological products and systems.

Standard 13: Students will develop abilities to assess the impact of products and systems.

Standard 17: Students will develop an understanding of and be able to select and use information and communication technologies.

Standard 18: Students will develop an understanding of and be able to select and use transportation technologies.

**Performance Indicators:**

Describe the similarities and differences between personal, commercial, and governmental transportation.

Name the five modes of transportation, and give examples of cargo they may transport.

List an advantage and disadvantage for each mode of transportation.

Describe the following types of transportation and give an example of each: On-site, inter-modal, domestic, international.

Describe transportation in terms of a system. Name inputs, processes, and outputs.

Describe the steps between departure and destination.

List types of transportation system control.

Name the vehicles involved in each mode of transportation.

<b>Assessment:</b>	<b>Acceptable Performance Level</b>
Local Technology Exams	Score of 70% or higher
Presentations	Score of 70% or higher
Projects	Score of 70% or higher

**Scope:** Students will learn the basics of transportation as a system; how it affects them, the world population, and the environment. The timeline of transportation from the invention of the wheel to effects on and predictions for the future will be weaved throughout the course.

**Sequence:**

Unit 1: Transportation Basics

Unit 2: Principles of Transportation

Unit 3: Rail Transportation

Unit 4: Water Transportation

Unit 5: Air Transportation

Unit 6: Highway Transportation

Unit 7: Pipeline Transportation

**Methodology:** 75-90% Hands on and visual learning. Remaining learning will take place through reading, lectures and discussions.
