

## **HYGIENE PRECAUTIONS AND PROCEDURES**

In order to promote and ensure the health and safety of all students and staff members, the Board of Education adopts the following policy on hygiene and sanitary procedures to deal with exposure to and contact with blood and other body fluids.

To prevent and/or minimize the transmission of contagious or communicable diseases or infections within the school community, all employees of the school district shall be trained by a certified professional in one of the appropriate precautions when providing first aid or otherwise dealing with situations that involve exposure to blood and other body fluids. Such precautionary measures will be followed uniformly in all instances and shall be applicable in all buildings and facilities throughout the school district,

The Superintendent of Schools is responsible for developing appropriate procedures to implement this policy and for informing all staff members of such procedures and ensuring compliance with them. The failure by any employee to utilize such procedures may form the basis for disciplinary action.
