

Message from Space - Receiver on Earth

You are the Earth receiving station. Since you cannot receiving pictures or words, you will have to receive colors instead.

1. The satellite sending station will be sending you the top row of colors, going across.
As you receive your message, put the appropriately colored Skittle in the boxes, one piece of candy in each box going across, in the same order you receive it.
You should read them back to the satellite sender to be sure you have received correctly. Make any corrections.
2. Do the same for each of the other rows, one at a time.
3. When you have received all of your message there should be a written message for Earth.
4. Switch roles with you being the sender and your partner being the receiver, using Message sheet #2.
Make up your own messages to send. Add more squares if necessary.
