8th grade Team   Technology Requests for 2005-06

As requested, our team has requested the following items for next year. They are in the order of importance

1. New computer for Stephanie Gehrig.

2. Upgrade/repair/replace Kelli Grom's computer. (She continued to have trouble with it.

3. Scanner for the MS Computer lab

4. EITHER

    a. A portable lab with lap tops for a class that would include a printer/scanner that has network access. This "lab on a cart" would allow us to shift computers to the class that needs them the most. We would hope the cart could hold a class worth of lap tops.
    b. 2 student workstations in each of our classrooms that would be hooked up to the network.

In addition, we would like as a building or district to consider the following:

1. Purchase of a 2nd video return cart.

2. Replacement/upgrade of tripod on Video return cart #1. It has been "repaired" several times but was of low grade to begin with and continues to give us problems.

3. A digital camcorder
