

Why a K-12 Curriculum Collection

There are several reasons why we think constructing a Curriculum repository makes sense. They include:

- Electronic medium makes it easy to change with the times.
- Storage and retrieval is easier from any location.
- We can share across grade levels, across school districts, and between teachers.
- We can preserve what we are currently doing for the next person in a format that makes it easy for them to customize the document and make it their own.
- We can organize our material by standard, grade level and unit of study.
- We can learn from one another about what's working for and with kids.
- We can add links to the internet into our preparation.
- It's homemade as opposed to store-bought, and that usually means quality.
- Working with the Standards as well as with our own material will help us all become more reflective practitioners and will ultimately help our students achieve!
