# **I. District Philosophy**

**The Wayne Central School District believes that the goal of education is the all-around development of each student. The role of the school is to enable individuals to develop to their fullest potential.**

**The school, in cooperation with the home and community, will assist the student with intellectual, social, cultural, emotional, physical and moral growth. The school should help create within each student an awareness of civic responsibilities and respect for authority to assist the student in becoming a well-integrated, responsible person capable of assuming a vital role in an evolving civilization.**

**The Wayne Central School District subscribes to the general theory of individual differences; namely, that each student is an individual and has innate abilities, ambitions, and emotions. In the process of educating this individual, the program should provide a challenge while reflecting a concern for needs based on individual capabilities.**

**The Wayne Central School District further subscribes to the following fundamental principles:**

- 1. Children, regardless of potential, are capable of learning and acquiring the skill and knowledge needed to function to the best of their ability in our society,**
- 2. Our responsibility is to see that children learn. The energies of all participants should be focused on achieving the desired outcomes. Accountability does not end with following established rules and procedures; its essence is found in results,**
- 3. Minimum competence, while necessary, is not enough. Successful participation in our society demands much more. All children are entitled to approved curriculum, to instructional methods, and to expectations that challenge them to perform at their best, and help them to become truly proficient in knowledge and skills,**
- 4. Every child in New York State is entitled to the resources necessary to provide the sound, basic education that the state constitution requires,**
- 5. Each participant in the educational system should have the opportunity to effectively discharge his or her responsibility, and each participant should be held accountable for achieving desired results. This principle applies to all participants in the educational process – students, parents, teachers, counselors, librarians, administrators, the Board of Education, and others,**
- 6. Achievement of desired results by individuals and groups should be rewarded. Creativity in our students needs to be nurtured and encouraged. Occasional failure in a large and diverse system is probably unavoidable. However, failure should not be permitted to persist. When it occurs, with either individuals or groups, help should be provided and the situation changed.**

## **II. District Mission Statement:**

**Based upon the belief that all students can learn, the staff of Wayne Central School district accepts the responsibility to teach all students regardless of differences, the fundamental skills. We further accept the responsibility to challenge all students to attain higher levels of achievement. Wayne Central will provide the opportunity, environment, and encouragement to meet this goal while developing the whole child physically, emotionally, and culturally.**

# III. NYS Learning Standards:

## **Health, Physical Education, and Home Economics**

1. Personal Health and Fitness – Students will have the necessary knowledge and skills to establish and maintain physical fitness, participate in physical activity, and maintain personal health.
2. A Safe and Healthy Environment – Students will acquire the knowledge and ability necessary to create and maintain a safe and healthy environment
3. Resource Management – Students will understand and be able to manage their personal and community resources.

## **Mathematics, Science, and Technology**

1. Analysis, Inquiry, and Design – Students will use mathematical analysis, scientific inquiry, and engineering design, as appropriate, to pose questions, seek answers, and develop solutions.
2. Information Systems – Students will access, generate, process, and transfer information using appropriate technologies
3. Mathematics – Students will understand mathematics and become mathematically confident by communicating and reasoning mathematically, by applying mathematics in real-world settings, and by solving problems through the integrated study of number systems, geometry, algebra, data analysis, probability, and trigonometry.
4. Science – Students will understand and apply scientific concepts, principles, and theories pertaining to the physical setting and living environment and recognize the historical development of ideas in science.
5. Technology – Students will apply technological knowledge and skills to design, construct, use, and evaluate products and systems to satisfy human and environmental needs.
6. Interconnectedness: Common Themes – Students will understand the relationships and common themes that connect mathematics, science, and technology and apply the themes to these and other areas of learning.
7. Interdisciplinary Problem Solving – Students will apply the knowledge and thinking skills of mathematics, science, and technology to address real-life problems and make informed decisions.

## **English Language Arts**

1. Students will listen, speak, read and write for information and understanding. As listeners and readers, students will collect data, facts and ideas; discover relationships, concepts, and generalizations; and use knowledge generated from oral, written, and electronically produced texts. As speakers and writers, they will use oral and written language that follows the accepted conventions of the English language to acquire, interpret, apply, and transmit information.
2. Language for Literary Response and Expression – Students will read and listen to oral, written, and electronically produced texts and performances from American and world literature; relate texts and performances to their own lives; and develop an understanding of the diverse social, historical, and cultural dimensions the texts and performances represent. As speakers and writers. Students will use oral and written language that follows the accepted conventions of the English language for self-expression and artistic creation.
3. Language for Critical Analysis and Evaluation – Students will listen, speak, read and write for critical analysis and evaluation. As listeners and readers, students will analyze experiences, ideas, information, and issues presented by others using a variety of established criteria. As speaker and writers, they will use oral and written language that follows the accepted conventions of the English language to present, from a variety of perspectives, their opinions and judgements on experiences, ideas, information and issues.
4. Language for Social Interaction – Students will listen, speak, read, and write for social interaction. Students will use oral and written language that follows the accepted conventions of the English language for effective social communication with a wide variety of people. As reader and listeners, they will use the social communications of others to enrich their understanding of people and their views.

## **Languages Other Than English**

1. Communication Skills – Students will be able to use a language other than English for communication.
2. Cultural Understanding – Students will develop cross-cultural skills and understandings.

## **The Arts**

1. Creating, Performing, and Participating in the Arts – Students will actively engage in the processes that constitute creation and performance in the arts (dance, music, theatre, and visual arts) and participate in various roles in the arts.
2. Knowing and Using arts materials and Resources – Students will be knowledgeable about and make use of the materials and resources available for participation in the arts in various roles.
3. Responding to and Analyzing Works of Art – Students will respond critically to a variety of works in the arts, connecting the individual work to other works and to other aspects of human endeavor and thought.
4. Understanding the Cultural Contributions of the Arts – Students will develop an understanding of the personal and cultural forces that shape artistic communication and how the arts in turn shape the diverse cultures of past and present society.

## **Career Development and Occupational Studies**

1. Career Development – Students will be knowledgeable about the world of work, explore career options, and relate personal skills, aptitudes, and abilities to future career decisions.
2. Integrated Learning – Students will demonstrate how academic knowledge and skills are applied in the workplace and other settings.
3. Universal Foundation Skills – Students will demonstrate mastery of the foundation skills and competencies essential for success in the workplace.
4. Career Majors – Students who choose a career major will acquire the career-specific technical knowledge/skills necessary to progress toward gainful employment, career advancement, and success in postsecondary programs.

## **Social Studies**

1. History of the United States and New York – Students will use a variety of intellectual skills to demonstrate their understanding of major ideas, eras, themes, developments, and turning points in the history of the United States and New York.
2. World History – Students will use a variety of intellectual skills to demonstrate their understanding of major ideas, eras, themes, developments and turning points in world history and examine the broad sweep of history from a variety of perspectives.
3. Geography – Students will use a variety of intellectual skills to demonstrate their understanding of the geography of the interdependent world in which we live – local, national and global – including the distribution of people, places, and environments over the Earth’s surface.
4. Economics – Students will use a variety of intellectual skills to demonstrate their understanding of how the United States and other societies develop economic systems and associated institutions to allocate scarce resources, how major decision-making units function in the United States and other national economies, and how an economy solves the scarcity problem through market and nonmarket mechanisms.
5. Civics, Citizenship, and Government – Students will use a variety of intellectual skills to demonstrate their understanding of the necessity for establishing governments; the governmental system of the United States Constitution; the basic civil values of American constitutional democracy; and the roles, rights, and responsibilities of citizenship including avenues of participation.

# VI. Course Overview

The objective of the Kindergarten Math Program is to embed Math concepts through out the school day with meaningful and relevant experiences. This program should be a developmentally appropriate, multisensory approach that uses manipulatives and hands-on activities to meet the NYS Math Standards. Problem solving will be integrated through out each of the following units:

1. Numbers and Numeration
2. Operations with Whole Numbers and Integers
3. Fractions and Decimals
4. Probability and Statistics
5. Geometry and Measurement
6. Problem Solving

**Key:** **I** Introduce  
**T** Teach  
**M** Master

# VII. Instructional Outline

## 1. NUMBERS AND NUMERATION

\*When teaching this unit the numerals will be introduced in this order:

- 0-5
- 6-10
- 11-19
- 20-31

- |  |          |
|--|----------|
| a. One to one correspondence   | M        |
| b. Identify, make and count groups (sets)  | M (0-10) |
| c. Recognize and match numerals to groups of objects   | M (0-10) |
| d. Written formation of numerals 0-12  | T        |
| e. Ordinal numbers (First, second, etc.)   | I        |
| f. Compare groups of objects (more, less, same...)   | T        |
| g. Rote counting by 1's and 10's to 100  | T        |
| h. Begin to recognize number sequences using terms such as "before, after, between"<br>(I.e. _____, 3, 4, _____) | M        |
| i. Introduce place value ones/tens through calendar activities   | T        |
| j. Introduce concepts odd and even through calendar activities   | I        |

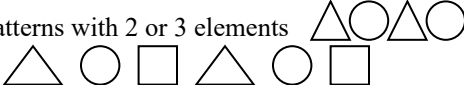

## 2. OPERATIONS WITH WHOLE NUMBERS AND INTEGERS

- |  |   |
|--|---|
| a. Use manipulatives to join groups of objects to 10                 | T |
| b. Use manipulatives to separate groups of objects from 10           | T |
| c. Draw pictures and use manipulatives to represent problems         | I |
| d. Introduce symbols: +, -, =  | I |
| e. Write an addition/subtraction sentence and match to manipulatives | T |
| f. Introduce role of zero in addition and subtraction                | T |

## 3. FRACTIONS AND DECIMALS

- |  |   |
|--|---|
| a. Part vs. Whole – Half equals a "fair share"           | M |
| b. Sharing of sets such as cookies or crayons as objects | T |

## 4. PROBABILITY AND STATISTICS

- |   |   |
|---|---|
| a. Classification/Sorting   |   |
| 1. Same and Different   | M |
| 2. Sort by Color, shape and size  | M |
| 3. Identify additional attributes of objects (i.e. Number of holes, smooth, etc.)   | I |
| 4. Record data using graphs, diagrams, tables                                       | I |
| 5. Interpret graphs, tables and diagrams  | I |
| b. Patterning   |   |
| 1. Identify patterns with 2 or 3 elements   | T |
|  |   |
| 2. Copy patterns with 2 or 3 elements   | M |
| 3. Extend patterns with 2 or 3 elements   | T |
| 4. Create own pattern using 2 or 3 elements   | T |
| 5. Describe identical patterns- Show them in different modes                        | T |
| c. Introduce the term and concept of estimation                                     | T |

## 5. GEOMETRY AND MEASUREMENT

- a. Geometry
  - 1. Identify then name the 6 shapes: circle, rectangle, square, triangle, rectangle, oval, diamond. T
  - 2. Identify the attributes of the 6 shapes. I
- b. Measurement
  - 1. Compare objects by using linear terms (i.e. taller, wider, longer, shortest...) M
  - 2. Estimate then measure objects using nonstandard units (i.e. cubes, paper clips) I
  - 3. Compare capacities of different containers with rice, sand, water, etc. T
  - 4. Estimate then measure the capacity of a container using nonstandard units (candy, cubes, balls, etc.) I
  - 5. Compare weights of different objects using nonstandard units (heavier, lighter, more, less, etc.) T
  - 6. Estimate then measure weights of objects using nonstandard units I
  - 7. Introduce standard English units of measurement i.e. inches I
- c. Time and Money
  - 1. Compare duration of time (longer, less time) M
  - 2. Tell time to the hour using analog and digital clocks T
  - 3. Write time to the hour T
  - 4. Calendar – today, tomorrow, yesterday; days of week, months, give date T
  - 5. Sequence events T
  - 6. Identify and name penny, nickel, dime T
  - 7. Value of penny, nickel, dime T
  - 8. Identify which item costs more/less T

## 5. PROBLEM SOLVING

- a. Positions
  - 1. Top, middle, bottom M
  - 2. Above (over), below (under) M
  - 3. Inside, outside M
  - 4. Before, after, between (in the middle) M
  - 5. Left, right T
- b. Mathematical Reasoning
  - 1. Develop number concepts through sorting and classifying M
  - 2. Integrate comparison of sets and counting with other activities (real life situations) M
  - 3. Relate counting to repeated patterns M
  - 4. Draw pictures and use manipulatives to represent problems I

# VIII. Course Benchmarks

# **IX. Units of Study**

# **Unit One**

## **Numbers and Numeration**

## **A. Unit Benchmarks**

**At the end of this unit students will be able to;**

1. Complete one to one correspondence
2. Identify, make and count groups (sets)
3. Recognize and match numerals to groups of objects
4. Write numerals 0-12
5. List ordinal numbers (First, second, etc.)
6. Compare groups of objects (more, less, same...)
7. Rote count by 1's and 10's to 100
8. Begin recognizing number sequences using terms such as "before, after, between"  
(i.e. \_\_\_\_\_, 3, 4, \_\_\_\_\_)
9. begin stating place value ones/tens through calendar activities
10. begin to understand the concepts odd and even through calendar activities

middles	triangle	addition
above	corners	in all
before	cone	subtract
between	pyramid	subtraction
right	sphere	how many
left	circle	left (remain)
outside	triangle	place value words (ones, tens, hundreds)
sort	rectangle	total
resort	sides	equals
as many as	corners	minus
more	equal	plus
most	equal groups	and
fewer	half	or
less	halves	not
least	same	estimate
category	fair share	pattern
sorting rule	number	point
number words zero to thirty	parts	measure
one	combinations	measurement
set	pieces	inch
order	first	graph
compare	last	predict
length	hour	model
longer	penny	properties
shorter	dime	attributes
taller	nickel	
about the same	minute	
weight	cost

## **Probability and Statistics**

## A. Unit Benchmarks

At the end of this unit students will be able to;

1. Classify/Sort
  - Same and Different
  - Sort by Color, shape and size
  - Identify additional attributes of objects (i.e. Number of holes, smooth, etc.)
  - Record data using graphs, diagrams, tables
  - Interpret graphs, tables and diagrams
2. Pattern
  - Identify patterns with 2 or 3 elements 
  - Copy patterns with 2 or 3 elements
  - Extend patterns with 2 or 3 elements
  - Create own pattern using 2 or 3 elements
  - Describe identical patterns- Show them in different modes
3. begin understanding the term and concept of estimation

# Unit Five

## Geometry and Measurement

## **A. Unit Benchmarks**

**At the end of this unit students will be able to;**

1. Geometry
  - Identify then name the 6 shapes: circle, rectangle, square, triangle, rectangle, oval, diamond.
  - Identify the attributes of the 6 shapes.
2. Measurement
  - Compare objects by using linear terms (i.e. taller, wider, longer, shortest...)
  - Estimate then measure objects using nonstandard units (i.e. cubes, paper clips)
  - Compare capacities of different containers with rice, sand, water, etc.
  - Estimate then measure the capacity of a container using nonstandard units (candy, cubes, balls, etc.)
  - Compare weights of different objects using nonstandard units (heavier, Lighter, more, less, etc.)
  - Estimate then measure weights of objects using nonstandard units
  - Use standard English units of measurement i.e. inches
3. Time and Money
  - Compare duration of time (longer, less time)
  - Tell time to the hour using analog and digital clocks
  - Write time
  - Calendar – today, tomorrow, yesterday; days of week, months, give date
  - Sequence events
  - Identify and name penny, nickel, dime
  - Identify the value of penny, nickel, dime
  - Identify which item costs more/less
